Introduction

The 1982 statistical yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every contract traded on the Exchange during 1982.

The yearbook begins with a trading summary for 1982 and is then divided into four main sections, one each for gold, silver, copper and gold options. Each section includes opening prices, high and low prices, closing and settlement prices, volume, open interest, stocks and deliveries for every COMEX trading day. Additional tables on related U.S. producer and dealer prices, European producer prices, and London gold and silver fixings are also listed.

We know this yearbook will prove to be a valuable source for financial and speculative users of futures markets and to students of commodities trading. Additional copies of this yearbook and previous issues are available for a nominal fee from the Commodity Exchange, Inc., (COMEX), 4 World Trade Center, New York, N.Y. 10048 (212) 938-2937.

1982 Trading Summary

Gold

Despite an ailing U.S. economy and high interest rates for most of the past year, COMEX gold futures trading continued to attract both commercial and speculative interest. Gold futures led the 1982 volume surge at COMEX, breaking all previous annual, monthly, and weekly records. The new volume figures position COMEX gold as the second most active commodity futures contract in the United States.

A total of 12,123,987 COMEX gold futures contracts were traded in 1982, exceeding 1981's record turnover figures by over two million contracts, and representing an annual volume increase of 16.9 percent. In addition, a new monthly gold trading record was set in March, when 1,264,724 contracts changed hands. A new weekly record was also set as 367,073 gold contracts traded during the week ending August 27.

The most active day for COMEX gold futures during 1982 was September 8, when 92,109 contracts were traded. For the year as a whole, trading volume averaged 48,303 contracts daily.

Gold prices fluctuated throughout a wide range during 1982. The spot price of COMEX gold was as low as $295.00 per troy ounce on June 21, and as high as $496.00 per troy ounce on September 8. The average spot settlement price for the year was $375.00.

At year-end, open interest in COMEX gold futures stood at 130,429 contracts.

Silver

COMEX silver futures continued to recover strongly in 1982, showing the biggest increase in volume of all Exchange contracts. Silver volume rose 127.9 percent over 1981's total, with 2,837,619 contracts traded.

Even more significant, perhaps, was the fact that silver trading grew increasingly more active as the year progressed. The heaviest weekly trading volume occurred during the week ending August 27, when 96,386 contracts were traded. In November, the contract recorded its most impressive monthly volume total in over two years: 350,637 contracts traded. In addition, the most active trading day in silver futures during 1982 was November 3, when volume reached 25,102 contracts.

Despite renewed trading interest, the price of silver declined for much of the year, before a late recovery boosted the average settlement price for 1982 to $7.95 per ounce. The price of spot silver hit a low of $4.81 per troy ounce on June 21, and reached a high of $11.30 on December 29.

Open interest in COMEX silver futures increased 20.7 percent over 1981, and at year-end, there were 33,808 open positions.

Copper
COMEX copper futures broke all volume and open interest records in 1982, providing a hint of encouragement concerning the prospects for a U.S. economic recovery.

A total of 2,332,925 COMEX copper contracts changed hands in 1982, representing a new annual high and a 41.6 percent increase over 1981's volume. In addition, new weekly and daily volume records were set during October. The week ending October 14 marked the highest volume week in COMEX copper history when 76,893 contracts changed hands. And on October 14, copper futures set an all-time daily volume record of 21,739 contracts.

Despite exceptional volume, copper prices remained depressed, consistent with 1981's price levels. The high for spot copper was 74.00 cents per pound on January 5, and the low, 54.30 cents on June 21. The average settlement price for spot copper during 1982 was 65.80 cents per pound.

On December 29, 1982, open interest in COMEX copper reached 93,300 contracts, a new all-time high. At year-end, copper open interest stood at 92,146 contracts. Additionally, COMEX copper stocks increased steadily thoughout the year and reached a record 272,999 short tons by year-end, compared to 186,920 short tons at the end of 1981.

Gold Options
On October 4, 1982, COMEX began trading options on its gold futures contract. In the last quarter of the year, a total of 56,752 contracts were traded, for an average daily trading volume of 930 contracts. At year-end, open interest in options on gold futures was 10,198 contracts.

Contract Specifications

	GOLD	SILVER
Trading Unit	100 troy ounces	5,000 troy ounces
Price Multiples and Fluctuations	Price changes are registered in multiples of ten cents (10¢) per troy once. During any one market day, price fluctuations are limited to twenty-five dollars ($25) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of one-tenth of one cent (1/10 of 1¢) per troy ounce. During any one market day, price fluctuations are limited to fifty cents (50¢) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.
Trading Hours	9:00 AM to 2:30 PM New York Time	9:05 AM to 2:15 PM New York Time
Trading Months	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any February, April, June, August, October and December falling within a 23-month period beginning with the current calendar month.	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 23-month period beginning with the current calendar month.
Trading Symbol	GC	SI
Deliverable Grades and Contract Size	100 troy ounces (five percent more or less) of refined gold, assaying not less than 995 fineness, cast either in one bar, or in three one-kilogram bars and bearing a serial number and stamp of a refiner approved and listed by COMEX.	5,000 troy ounces (six percent more or less) of refined silver, assaying not less than 999 fineness, in bars cast in weights of 1,000 or 1,100 troy ounces and bearing a brand approved and listed by COMEX.

	COPPER	GOLD OPTIONS
Trading Unit	25,000 pounds	Underlying asset is equal to one Comex gold futures contract.
Price Multiples and Fluctuations	Price changes are registered in multiples of five-hundredths of a cent (5/100 of 1¢) per pound. During any one market day, price fluctuations are limited to five cents (5¢) per pound above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in mulitples of ten cents (10¢) per troy ounce. Strike Price Increments: $10/oz. apart for strike prices below $300. $20/oz. apart for strike prices between $300 and $500. $30/oz. apart for strike prices between $500 and $800. $40/oz. apart for strike prices above $800. On the first trading day there will be five strike prices each for puts and calls.
Trading Hours	9:50 AM to 2:00 PM New York Time	9:00 AM to 2:30 PM New York Time
Trading Months	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 23-month period beginning with the current calendar month.	Group A: February, June, October Group B: April, August, December The trading cycle will include the nearest month from Group A plus every month in Group B.
Trading Symbol	CU	OG
Deliverable Grades and Contract Size	25,000 pounds (two percent more or less) of electrolytic, lake, or certain types of fire-refined copper. The basis grade is electrolytic copper cathodes. Fire-refined high conductivity copper and lake copper are deliverable at the contract (basis) price. Depending on the particular refinery shape, electrolytic copper is deliverable at a premium of 5/8¢ or 1/4¢ per pound above the contract price. Fire-refined copper is deliverable at a discount of 1/8¢ per pound below the contract price. All deliverable copper must conform to specifications established by the American Society for Testing and Materials for the particular shape and grade involved and be of a brand approved and listed by COMEX.	Exercise: Until 3:00 PM N.Y. time on any business day for which the option is listed for trading. Upon exercise, option holders receive the appropriate short or long COMEX gold futures contract by way of a book entry. Writers of options who receive a notice of exercise are assigned the opposite futures position.

KEY TO ABBREVIATIONS

Opening Futures Prices

@: Signifies an opening during which no trades were effected for the contract month. The quote which precedes the "@" is the prevailing bid in the market during the opening period while the price following the "@" represents the prevailing offer. If there is no price preceding or following the "@," there was either no bid or offer during the opening call, respectively.

T: Signifies that at least one transaction was effected during the opening period. If transactions were effected at more than one price during the opening period in a contract month, the high and low prices for such months are shown surrounding the "T" indicating the direction in which the market moved during the opening period.

Introduction

The 1983 statistical yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every contract traded on the Exchange during 1983. The yearbook is divided into two volumes, one each for metals and gold options.

The yearbook for metals begins with a trading summary for 1983 and is then divided into four main sections—gold, silver, copper and aluminum. Each section includes opening prices, high and low prices, closing and settlement prices, volume, open interest, stocks and deliveries for every COMEX trading day. Additional tables on related U.S. producer and dealer prices and London gold and silver fixings are also listed.

We know this yearbook will prove to be a valuable source for financial and speculative users of futures markets and to students of commodities trading. Additional copies of this yearbook and previous issues are available for a nominal fee from the Commodity Exchange, Inc., (COMEX), 4 World Trade Center, New York, N.Y. 10048 (212) 938-2937.

1983 Trading Summary

General improvement in the U.S. economic climate resulted in unprecedented trading activity at COMEX in 1983. Although COMEX gold was somewhat less active than in 1982, soaring commercial and investor interest in COMEX silver and copper futures brought annual Exchange volume to a new record high—a total of 20,401,098 contracts. Several new individual trading records were also set by the COMEX contracts during the course of 1983.

Gold

Trading activity in COMEX gold futures declined slightly in 1983 from the record level of a year earlier, due, in part, to an historically high level of real interest rates and the resurgent strength of the U.S. dollar. However, despite a volume fall-off of about 14 percent, gold remained COMEX's most active product in 1983. With a total of 10,382,805 contracts traded, gold futures accounted for 50.9 percent of annual Exchange volume last year.

One new trading record for the contract was set in early 1983 when monthly gold volume reached an all-time high of 1,368,999 contracts in January. Daily trading volume during the past year averaged 41,202 contracts.

COMEX gold prices fluctuated between an annual high of $514.00 per troy ounce on February 15 and a low of $372.00 on December 16. At year-end, the spot settlement price for gold was $385.10 per troy ounce.

Open interest in gold stood at 138,069 contracts on December 30.

Silver

Renewed interest in silver by both commercial and speculative market participants resulted in unprecedented annual volume in COMEX silver futures during 1983. A record total of 6,432,982 silver contracts was traded at the Exchange last year, marking a significant increase of 126.7 percent over silver volume in 1982.

Much of the heightened activity during 1983 reflected increased industrial demand for silver, resulting from the economic recovery which followed the recession of 1981-82. In addition, investor participation in the silver market increased in 1983 due to fairly regular fluctuations in the price of the commodity over the course of the year. Spot silver prices ranged from a high of $14.74 per troy ounce on February 15 to a low of $8.38 on October 31, settling at $9.02 on Decmeber 30.

Average daily volume for the year was 25,528 contracts. Year-end open interest stood at 60,334 outstanding contracts.

Copper
Numerous copper volume and open interest records were broken in 1983. Following the growth exhibited the previous year, 1983 volume in COMEX copper increased 36.6 percent over 1982's annual mark for a new record total of 3,186,914 contracts.

The height of activity in copper occurred during February when a new monthly record of 381,645 copper contracts was set, and a new weekly record of 121,390 contracts was set between February 21, and February 25. The month also saw a new copper open interest record of 128,827 contracts set on February 24.

In addition, a new daily volume record for copper futures was achieved on November 28, with 38,478 contracts traded. Daily copper volume for the year averaged 12,646 contracts.

Copper price levels in 1983 were higher, for the most part, than in 1982, peaking at 80.90 cents per pound on May 11 and dropping to 61.45 cents on November 10. On December 30, the spot copper price settled at 65.75 cents.

Year-end open interest in copper stood at 106,898 positions.

Aluminum
COMEX introduced trading in aluminum futures on December 8, 1983. As the only contract market for aluminum in North America, COMEX will offer U.S. companies the opportunity to use a contract that is dollar-denominated, that offers delivery in a widely utilized superior grade of metal, that trades during compatible business hours, and that accesses convenient delivery points.

With an opening day volume of 4,103 contracts, COMEX aluminum set an all-time record for a new metals contract. At year-end aluminum open interest stood at 2,977 contracts.

Contract Specifications

	GOLD	SILVER
Trading Unit	100 troy ounces	5,000 troy ounces
Price Multiples and Fluctuations	Price changes are registered in multiples of ten cents (10¢) per troy once. During any one market day, price fluctuations are limited to twenty-five dollars ($25) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of one-tenth of one cent (1/10 of 1¢) per troy ounce. During any one market day, price fluctuations are limited to fifty cents (50¢) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.
Trading Hours	9:00 AM to 2:30 PM New York Time	9:05 AM to 2:15 PM New York Time
Trading Months	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any February, April, June, August, October and December falling within a 23-month period beginning with the current calendar month.	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 23-month period beginning with the current calendar month.
Trading Symbol	GC	SI
Deliverable Grades and Contract Size	100 troy ounces (five percent more or less) of refined gold, assaying not less than 995 fineness, cast either in one bar, or in three one-kilogram bars and bearing a serial number and stamp of a refiner approved and listed by COMEX.	5,000 troy ounces (six percent more or less) of refined silver, assaying not less than 999 fineness, in bars cast in weights of 1,000 or 1,100 troy ounces and bearing a brand approved and listed by COMEX.

	COPPER	ALUMINUM
Trading Unit	25,000 pounds	40,000 pounds
Price Multiples and Fluctuations	Price changes are registered in multiples of five one-hundredths of a cent (5/100 of 1¢) per pound. During any one market day, price fluctuations are limited to five cents (5¢) per pound above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in mulitples of five one-hundredths of a cent (5/100 of 1¢) per pound. During any one market day, price fluctuations are limited to five cents (5¢) per pound above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Currently, trading is conducted in any January, March, May, July, September, and December falling within a 23-month period beginning with the current calendar month.
Trading Symbol	CU	AL
Deliverable Grades and Contract Size	25,000 pounds (two percent more or less) of electrolytic, lake, or certain types of fire-refined copper. The basis grade is electrolytic copper cathodes. Fire-refined high conductivity copper and lake copper are deliverable at the contract (basis) price. Depending on the particular refinery shape, electrolytic copper is deliverable at a premium of 5.8¢ or 1.4¢ per pound above the contract price. Fire-refined copper is deliverable at a discount of 1.8¢ per pound below the contract price. All deliverable copper must conform to specifications established by the American Society for Testing and Materials for the particular shape and grade involved and be of a brand approved and listed by COMEX.	40,000 pounds (two percent more or less) or virgin primary aluminum grade P1020A (in ingots, sows or T-bars) during one of the specified futures months. At the option of the seller, primary aluminum grade P1535A (in ingots, sows or T-bars) may also be delivered against the aluminum contract at a discount of one cent ($.01) per pound. Each lot must be composed entirely of one grade and shape. All deliverable aluminum must either a) bear the brand or distinguishable mark of an approved smelter, or b) be accompanied by a declaration of a COMEX clearing member as to the origin of the aluminum. Each lot of deliverable aluminum must be accompanied by the producer's heat analysis or by a certificate of analysis from a COMEX-approved assayer.

KEY TO ABBREVIATIONS

Opening Prices

α: Signifies an opening during which no trades were effected for the contract month. The quote which precedes the "α" is the prevailing bid in the market during the opening period while the price following the "α" represents the prevailing offer. If there is no price preceding or following the "α," there was either no bid or offer during the opening call, respectively.

T: Signifies that at least one transaction was effected during the opening period. If transactions were effected at more than one price during the opening period in a contract month, the high and low prices for such months are shown surrounding the "T" indicating the direction in which the market moved during the opening period.

Closing and Settlement Futures Prices

C = Closing Price
S = Settlement Price

Introduction

The 1983 statistical yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every contract traded on the Exchange during 1983. The yearbook is divided into two volumes, one each for metals and gold options.

The yearbook for gold options begins with a trading summary for 1983 and is then divided into sections including opening prices, high and low prices, closing and settlement prices, volume and open interest for puts and calls for every COMEX trading day. In addition, there is also a table listed for 1983 exercises.

We know this yearbook will prove to be a valuable source for financial and speculative users of futures markets and to students of commodities trading. Additional copies of this yearbook and previous issues are available for a nominal fee from the Commodity Exchange, Inc., (COMEX), 4 World Trade Center, New York, N.Y. 10048 (212) 938-2937.

Trading Summary

Options on Gold Futures
Options on gold futures began trading at COMEX on October 4, 1982. The new product displayed marked growth during 1983 on its first full year of trading, with an annual volume of 386,501. Moreover, options volume—as a percentage of gold futures—increased substantially through the course of 1983. Options volume was 2.6 percent of gold volume in both the first and second quarters. 3.6 percent in the third quarter, and 6.9 percent in the fourth quarter. Average daily volume grew from 915 contracts in the fourth quarter of 1982 to 2,467 contracts in the same quarter of 1983.

In an effort to enhance the development of the new contract, a special category of Exchange membership designed for the trading of gold options was introduced in 1983—Option Memberships. Under a two-phase plan, temporary option permits were issued to all holders of COMEX Financial Instrument Permits (FIPs), good for a period of one year. Holders who fulfill certain minimum trading requirements, including the execution of 5,000 gold option contracts between September 1, 1983, and August 31, 1984, will be granted permanent Option Memberships.

Comex gold options set three volume records in 1983—a monthly record of 61,384 contracts in December, a weekly record of 18,486 contracts between December 12 and 16, and a daily record of 5,617 contracts on December 16.

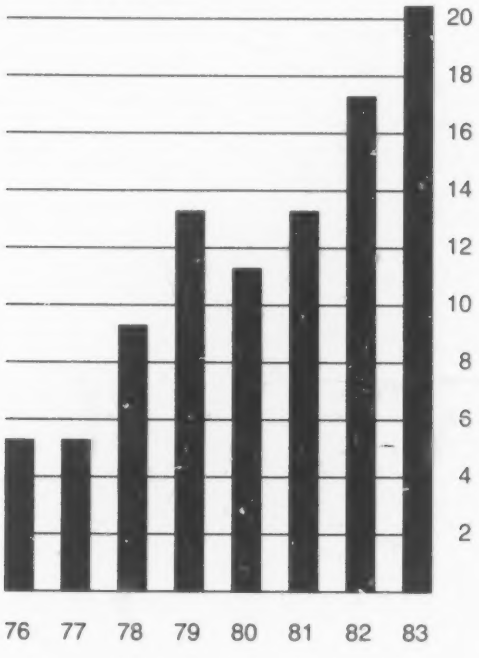
An open interest record was also set in options on November 7, with 35,489 contracts outstanding. Year-end open interest in gold options was 32,193 contracts.

Contract Specifications

	GOLD OPTIONS
Trading Unit	Underlying asset is equal to one Comex gold futures contract.
Price Multiples and Fluctuations	Price changes are registered in mulitples of ten cents (10¢) per troy ounce. Strike Price Increments: $10/oz. apart for strike prices below $300. $20/oz. apart for strike prices between $300 and $500. $30/oz. apart for strike prices between $500 and $800. $40/oz apart for strike prices above $800. On the first trading day there will be five strike prices each for puts and calls.
Trading Hours	9:00 AM to 2:30 PM New York Time
Trading Months	Group A: February, June, October Group B: April, August, December The trading cycle will include the nearest month from Group A plus every month in Group B.
Trading Symbol	OG
Deliverable Grades and Contract Size	Exercise: Until 3:00 PM N.Y. time on any business day for which the option is listed for trading. Upon exercise, option holders receive the appropriate short or long COMEX gold futures contract by way of a book entry. Writers of options who receive a notice of exercise are assigned the opposite futures position.

Total COMEX Trading Volume

(Millions of Contracts)



1983 Trading Volume

Aluminum	11,896
Total	20,401,098

KEY TO ABBREVIATIONS

Opening Futures Prices

@ : Signifies an opening during which no trades were effected for the contract month. The quote which precedes the "@" is the prevailing bid in the market during the opening period while the price following the "@" represents the prevailing offer. If there is no price preceding or following the "@," there was either no bid or offer during the opening call, respectively.

T: Signifies that at least one transaction was effected during the opening period. If transactions were effected at more than one price during the opening period in a contract month, the high and low prices for such months are shown surrounding the "T" indicating the direction in which the market moved during the opening period.

Closing and Settlement Futures Prices

C = Closing Price
S = Settlement Price

Volume of Contracts Traded

WT = Weekly Total
MT = Monthly Total
